Profile

Computer Engineering student with experience in personal web and mobile development projects. I've worked with agile methodologies, leading small teams and collaborating on dynamic projects that required adaptability and problem-solving.

These experiences have strengthened not only my technical foundation but also my ability to communicate ideas, coordinate tasks, and deliver results in collaborative environments. I'm eager to begin my career as a junior full-stack developer in an environment that empowers growth, encourages innovation, and allows me to create technology with purpose.

Employment History

Object-Oriented Programming Teacher Assistant, Universidad del Valle, Guatemala

JUNE 2025 – PRESENT

As an Object-Oriented Programming (OOP) Teacher Assistant, I guided students in understanding key concepts such as classes, objects, inheritance, and polymorphism. My role included supporting labs, reviewing assignments, and providing feedback to help students connect theory with real-world programming.

This experience strengthened my ability to explain technical concepts clearly and foster problem-solving, while also reinforcing soft skills such as communication and teamwork.

Education

Engineering in Computer Science and Information Technology, Universidad del Valle, Guatemala

2023 – PRESENT

Bachelor of Science and Letters, Colegio Decroly Americano, Guatemala

2011 – 2022

Graduated with High Honors and Recognized for outstanding academic performance throughout high school.

Highlighted Projects

Sol Store - E-commerce Web Application, Guatemala

JANUARY 2025 – DECEMBER 2025

An online store for geek and anime printed products.
